

I am writing in support of keeping K-LOVE as is and not switching to LPFM. I am struggling with many factors right now in my life and I would greatly miss the K-LOVE message and support that I have from them. There are many in my community that listen to K-LOVE for many differing reasons but each and every one of us use their message to support us through difficult and positive times. In daily life we all run in to things that can get us down and to have K-LOVE there when we turn on the radio is such a positive thing. I would hope that the FCC will understand that K-LOVE provides a service to people that is truly needed and will not tamper with the signal.

Thank you!!!
